Editor and Business Manager for The Ohio State Engineer Are Chosen to Fill Vacancy

To fill the vacancy left by Edward W. Bailey, senior in chemical engineering, and present editor of the Ohio State Engineer, an editorial exam was given on May 5. As a result of this examination Yvonne Lamoreaux, Electrical Engineering II, was chosen editor for the coming year. Rosella Horine, Architectural Engineering I, was selected as business manager to replace Kenneth Lacy, who now holds this position.

At the annual banquet of the staff, gold keys were awarded to Edward W. Bailey, Kenneth Lacy, Henry Weisz, and Louise McDaniel. A silver key was given to Yvonne Lamoreaux, and bronze keys to Rosella Horine, Ernest Grabill, and Jay Antenen.

STEEL IS FLOWING TODAY THAT WILL BE FLYING NEXT MONTH

ALLOY steel, conceived in the mighty heat of the electric furnace, is just being born when it teems into ingot molds. From here it rapidly multiplies into countless forms and shapes, reaching maturity within a matter of days as parts in finished warplanes, tanks, guns, ships or munitions.

Many of those products will be better, and will perform their war job without fail—thanks to the quality control exercised by Allegheny Ludlum on every batch of alloy steel leaving its mills. It's a

rigid control, true, but very necessary to give our fighting men the decisive edge in battle that better equipment assures. And the same close control, coupled with Allegheny Ludlum's research activities—now developing still better fighting steels for our armed forces—will continue after victory is won, to help create better peacetime products for you.

But before there can be peace, we at home must exert every effort to win the war. Collection of scrap metal, salvage of waste fats, conservation wherever possible and regular purchases of war bonds are

your contributions from the home front. Only thus can you give the men behind the guns the tools to assure victory.
